Molecular formula: C(4)H(6)N(2)
Synonyms: 1-Methylimidazole

2. Hazards Identification

Emergency overview

COMBUSTIBLE LIQUID.
Corrosive to the skin, eyes and respiratory system.
HARMFUL IN CONTACT WITH SKIN.

State of matter: liquid
Colour: colourless to yellow
Odour: amine-like

Potential health effects

Acute toxicity:
Of moderate toxicity after single ingestion. The inhalation of a highly enriched/saturated vapor-air-mixture represents an unlikely acute hazard. Of pronounced toxicity after short-term skin contact.

Irritation / corrosion:
Corrosive! Damages skin and eyes. May cause severe damage to the eyes.

Assessment other acute effects:
The available information is not sufficient for evaluation.

Chronic toxicity:

Genotoxicity: The substance was not mutagenic in bacteria.

Signs and symptoms of overexposure:
The most important known symptoms and effects are described in the labelling (see section 2) and/or in section 11., Further symptoms are possible
Potential environmental effects

Aquatic toxicity:
There is a high probability that the product is not acutely harmful to aquatic organisms. The inhibition of the degradation activity of activated sludge is not anticipated when introduced to biological treatment plants in appropriate low concentrations.

Terrestrial toxicity:
Study scientifically not justified.

4. First-Aid Measures

General advice:
First aid personnel should pay attention to their own safety. If the patient is likely to become unconscious, place and transport in stable sideways position (recovery position). Immediately remove contaminated clothing.

If inhaled:
Keep patient calm, remove to fresh air. Assist in breathing if necessary. Consult a physician.

If on skin:
Flush with copious amounts of water for at least 15 minutes. Immediate medical attention required.

If in eyes:
In case of contact with the eyes, rinse immediately for at least 15 minutes with plenty of water. Immediate medical attention required.

If swallowed:
Rinse mouth and then drink plenty of water. Do not induce vomiting. Immediate medical attention required.

Note to physician
Treatment: Treat according to symptoms (decontamination, vital functions), no known specific antidote. Pulmonary edema prophylaxis. Medical monitoring for at least 24 hours.

5. Fire-Fighting Measures

Flash point: 92 °C (DIN 51758)
Autoignition: 488 °C (DIN EN 14522)
Lower explosion limit: 2.7 % (V)
Upper explosion limit: 15.7 % (V)
Self-ignition temperature: Based on its structural properties the product is not classified as self-igniting.

Suitable extinguishing media:
water spray, dry powder, foam, carbon dioxide

Hazards during fire-fighting:
nitrogen oxides, carbon oxides
The substances/groups of substances mentioned can be released in case of fire. Under certain conditions in case of fire other hazardous combustion products may be generated.

Protective equipment for fire-fighting:
Firefighters should be equipped with self-contained breathing apparatus and turn-out gear.
Further information:
Dispose of fire debris and contaminated extinguishing water in accordance with official regulations.

Impact Sensitivity:
Remarks: Based on the chemical structure there is no shock-sensitivity.

6. Accidental release measures

Personal precautions:
Avoid inhalation. Avoid contact with the skin, eyes and clothing.

Environmental precautions:
Do not discharge into drains/surface waters/groundwater.

Cleanup:
For small amounts: Pick up with suitable appliance and dispose of.
For large amounts: Pick up with suitable appliance and dispose of.

7. Handling and Storage

Handling
General advice:
Ensure thorough ventilation of stores and work areas.

Protection against fire and explosion:
Prevent electrostatic charge - sources of ignition should be kept well clear - fire extinguishers should be kept handy.

Storage
General advice:
Containers should be stored tightly sealed in a dry place.
Keep at temperature not exceeding 25 °C.

Storage incompatibility:
General advice: Segregate from acids and acid forming substances.

Storage stability:
Storage temperature: < 25 °C
Storage duration: 12 Months
From the data on storage duration in this safety data sheet no agreed statement regarding the warrantee of application properties can be deduced.

8. Exposure Controls and Personal Protection

Personal protective equipment
Respiratory protection:
Wear a NIOSH-certified (or equivalent) organic vapour/particulate respirator as needed.

Hand protection:
Chemical resistant protective gloves, Suitable materials, rubber, plastic

Eye protection:
Tightly fitting safety goggles (chemical goggles) and face shield.
Body protection:
Body protection must be chosen depending on activity and possible exposure, e.g. apron, protecting boots, chemical-protection suit (according to EN 14605 in case of splashes or EN ISO 13982 in case of dust).

General safety and hygiene measures:
Handle in accordance with good industrial hygiene and safety practice. Wearing of closed work clothing is required additionally to the stated personal protection equipment. Avoid contact with the skin, eyes and clothing. Avoid inhalation of vapour.

9. Physical and Chemical Properties

Form: liquid
Odour: amine-like
Odour threshold: No data available.
Colour: colourless to yellow
pH value: 11.3 (100 g/l)
Melting point: -2 °C
Boiling point: 198 °C
Vapour pressure: 0.4 mbar (20 °C)
Density: 1.03 g/cm³ (20 °C)
Partitioning coefficient n-octanol/water (log Pow): -0.19 (25 °C) (OECD Guideline 107)
Viscosity, dynamic: 1.89 mPa.s (20 °C) (calculated (from kinematic viscosity))
1.33 mPa.s (40 °C) (calculated (from kinematic viscosity))
Viscosity, kinematic: 1.83 mm²/s (20 °C) (OECD 114)
1.30 mm²/s (40 °C) (OECD 114)
Particle size: The substance / product is marketed or used in a non solid or granular form.
Solubility in water: 145.8 g/l (25 °C)
Molar mass: 82.11 g/mol

10. Stability and Reactivity

Conditions to avoid:
See MSDS section 7 - Handling and storage.

Substances to avoid:
mineral acids

Hazardous reactions:
Exothermic reaction. Reacts with acids.

Decomposition products:
Hazardous decomposition products: No hazardous decomposition products if stored and handled as prescribed/indicated.

Thermal decomposition:
Stable up to boiling point.

11. Toxicological information

Acute toxicity

Oral:
Type of value: LD50
Species: rat
Inhalation:
Species: rat
Value: (BASF-Test)
Exposure time: 8 h
Inhalation-risk test (IRT): No mortality within 8 hours as shown in animal studies. The inhalation of a highly saturated vapor-air mixture represents no acute hazard.

Dermal:
Type of value: LD50
Species: rabbit
Value: > 400 - < 640 mg/kg (BASF-Test)

Irritation / corrosion
Skin:
Species: rabbit
Result: Corrosive.
Method: BASF-Test

Eye:
Species: rabbit
Result: Risk of serious damage to eyes.
Method: BASF-Test

Aspiration Hazard:
No aspiration hazard expected.

12. Ecological Information

Fish
Acute:
DIN 38412 Part 15 static
Leuciscus idus/LC50 (96 h): > 100 - < 215 mg/l
The details of the toxic effect relate to the nominal concentration.

Chronic:
Study scientifically not justified.

Aquatic invertebrates
Acute:
Directive 79/831/EEC static
Daphnia magna/EC50 (48 h): 267.9 mg/l
The details of the toxic effect relate to the nominal concentration. The product will cause changes in the pH value of the test system. The result refers to an unneutralized sample. After neutralization a reduction in harmful effect can be observed.

Chronic:
Study scientifically not justified.

Aquatic plants
Toxicity to aquatic plants:
DIN 38412 Part 9 static
green algae/EC50 (72 h): 180.7 mg/l
The details of the toxic effect relate to the nominal concentration.
Microorganisms

Toxicity to microorganisms:
DIN 38412 Part 8 aquatic
bacterium/EC10 (17 h): 589.6 mg/l
The details of the toxic effect relate to the nominal concentration. The product will cause changes in the pH value of the test system. The result refers to an unneutralized sample. After neutralization a reduction in harmful effect can be observed.

DIN 38412 Part 8 aquatic
bacterium/EC50 (17 h): 1,050 mg/l
The details of the toxic effect relate to the nominal concentration.

Degradability / Persistence

Biological / Abiological Degradation

Test method: OECD Guideline 301 F (aerobic), activated sludge
Method of analysis: BOD of the ThOD
Degree of elimination: 0 - 10 % (28 d)

Test method: OECD Guideline 302 B (aerobic), activated sludge, industrial
Method of analysis: DOC reduction
Degree of elimination: 0 - 10 % (20 d)
Evaluation: Not readily biodegradable (by OECD criteria). The product is biodegradable after extended adaptation.

Bioaccumulation

Because of the n-octanol/water distribution coefficient (log Pow) accumulation in organisms is not to be expected.

Environmental mobility:
Transport between environmental compartments:
calculated volatility/water - air
calculated adsorption/water - soil
KOC: 623
log KOC: 2.79
The data refer to the charged form of the substance. Under environmental conditions, the substance will almost completely be in its charged form.

13. Disposal considerations

Waste disposal of substance:
Incinerate in suitable incineration plant, observing local authority regulations.

Container disposal:
Contaminated packaging should be emptied as far as possible; then it can be passed on for recycling after being thoroughly cleaned.

14. Transport Information

Land transport
TDG
Hazard class: 8
Packing group: II
ID number: UN 2922
Hazard label: 8, 6.1
Proper shipping name: CORROSIVE LIQUID, TOXIC, N.O.S. (contains 1-METHYLIMIDAZOLE)
Sea transport
IMDG
Hazard class: 8
Packing group: II
ID number: UN 2922
Hazard label: 8, 6.1
Marine pollutant: NO
Proper shipping name: CORROSIVE LIQUID, TOXIC, N.O.S. (contains 1-METHYLIMIDAZOLE)

Air transport
IATA/ICAO
Hazard class: 8
Packing group: II
ID number: UN 2922
Hazard label: 8, 6.1
Proper shipping name: CORROSIVE LIQUID, TOXIC, N.O.S. (contains 1-METHYLIMIDAZOLE)

15. Regulatory Information

Federal Regulations
Registration status:
Chemical DSL, CA released / listed

WHMIS classification: D1B: Materials Causing Immediate and Serious Toxic Effects - Toxic material
D2B: Materials Causing Other Toxic Effects - Toxic material

THIS PRODUCT HAS BEEN CLASSIFIED IN ACCORDANCE WITH THE HAZARD CRITERIA OF THE CPR AND THE MSDS CONTAINS ALL THE INFORMATION REQUIRED BY THE CPR.

16. Other Information

We support worldwide Responsible Care® initiatives. We value the health and safety of our employees, customers, suppliers and neighbors, and the protection of the environment. Our commitment to Responsible Care is integral to conducting our business and operating our facilities in a safe and environmentally responsible fashion, supporting our customers and suppliers in ensuring the safe and environmentally sound handling of our products, and minimizing the impact of our operations on society and the environment during production, storage, transport, use and disposal of our products.
