SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1 Product identifier Ammonium sulphate

Trade name: Ammonium sulphate
CAS Number: 7783-20-2
EC number: 231-984-1
Registration number 01-2119455044-46-0020

1.2 Relevant identified uses of the substance or mixture

- Sector of Use
  SU3  Industrial uses: Uses of substances as such or in preparations at industrial sites

- Application of the substance / the mixture
  Fertiliser
  pH-corrective agent
  Use in insecticides, herbicides and fungicides
  Flame retardants
  Chemical Intermediate
  Laboratory chemicals
  Pharma Active ingredients

1.3 Details of the supplier of the safety data sheet

UBE Chemical Europe, S.A.
Polígono El Serrallo s/n
12100 Grao de Castellón (Spain)
Tel: +34 964 73 80 00
sds.ube.eu@ube.es

1.4 Emergency telephone number: +44 (0)1235 239670 (24h/7day)

SECTION 2: Hazards identification

2.1 Classification of the substance or mixture

Classification according to Regulation (EC) No 1272/2008
The substance is not classified according to the CLP regulation.

2.2 Label elements

Labelling according to Regulation (EC) No 1272/2008 None
Hazard pictograms None
Signal word None
Hazard statements None
Precautionary statements
P102 Keep out of reach of children.
P270 Do not eat, drink or smoke when using this product.

2.3 Other hazards No hazards to be particularly mentioned.

Results of PBT and vPvB assessment
PBT: Not applicable.
vPvB: Not applicable.

SECTION 3: Composition/information on ingredients

3.1 Chemical characterisation: Substances
CAS No. Description
7783-20-2 ammonium sulphate

(Contd. on page 2)
SECTION 4: First aid measures

4.1 Description of first aid measures

- **General information:**
  - Immediately remove any clothing soiled by the product.
  - Take affected persons out into the fresh air.
  - Avoid contact with eyes, skin and clothing.

- **After inhalation:**
  - If breathing dust:
    - Supply fresh air and be sure to call for a doctor.
  - After inhalation of decomposition products:
    - Take affected persons into fresh air and keep quiet.
    - Seek medical treatment.

- **After skin contact:** Immediately wash with water and soap and rinse thoroughly.

- **After eye contact:**
  - Flush eyes with water for at least 15 minutes, keeping eyelids open.
  - Seek medical treatment.

- **After swallowing:**
  - Rinse out mouth and then drink plenty of water.
  - Seek immediate medical advice.

4.2 Most important symptoms and effects, both acute and delayed

- After inhalation of the product or decomposition:
  - Risk of pulmonary edema. Symptoms can appear later.

- **Information for doctor:**
  - After inhalation of the product or decomposition: Risk of pulmonary edema. Symptoms can appear later.
  - Prophylaxis of pulmonary edema
  - Later observation for pneumonia and pulmonary oedema.

- **Hazards:**
  - After inhalation of decomposition products: Risk of pulmonary edema. Symptoms can appear later.

4.3 Indication of any immediate medical attention and special treatment needed

- No specific treatment information is available. Symptomatic treatment is advisable.

SECTION 5: Firefighting measures

5.1 Extinguishing media

- **Suitable extinguishing agents:**
  - Fire-extinguishing powder
  - Carbon dioxide
  - Water haze

- **For safety reasons unsuitable extinguishing agents:** Not known

5.2 Special hazards arising from the substance or mixture

- Nitrogen oxides (NOx)
- SO3
- Ammonia (NH3)

5.3 Advice for firefighters

- **Protective equipment:**
  - Do not inhale explosion gases or combustion gases.
  - Mouth respiratory protective device.
  - Wear fully protective suit.
Additional information
The product is not combustible, the fire extinguishing method of surrounding areas should be considered.
Dispose of fire debris and contaminated fire fighting water in accordance with official regulations.
Cool endangered receptacles with water spray.
Collect contaminated fire fighting water separately. It must not enter the sewage system.

SECTION 6: Accidental release measures

6.1 Personal precautions, protective equipment and emergency procedures
Handle in accordance with good industrial hygiene and safety practice.
Wear protective equipment. Keep unprotected persons away.
Use respiratory protective device against the effects of fumes/dust/aerosol.
Ensure adequate ventilation.

6.2 Environmental precautions:
Keep contaminated washing water and dispose of appropriately.
Do not allow product to reach sewage system or any water course.

6.3 Methods and material for containment and cleaning up:
Sweep/shovel up
Rinse affected area with water
Collect the solid product with shovel and deposit it in a suitable container.

6.4 Reference to other sections
See Section 7 for information on safe handling.
See Section 8 for information on personal protection equipment.
See Section 13 for disposal information.

SECTION 7: Handling and storage

7.1 Precautions for safe handling
Prevent formation of dust.
Avoid contact with eyes, skin and clothing.
Provide suction extractors if dust is formed.
Ensure good ventilation/exhaustion at the workplace.
Keep away from foodstuffs, beverages and feed.
Immediately remove all soiled and contaminated clothing.
Wash hands before breaks and at the end of work.
Do not eat, drink, smoke or sniff while working.

7.2 Conditions for safe storage, including any incompatibilities
Storage:
Requirements to be met by storerooms and receptacles: Store in a dry place with low humidity.
Information about storage in one common storage facility:
Store away from water.
Do not store together with alkalis, nitrites and nitrates.
Store away from oxidising agents.
Further information about storage conditions:
Store in dry conditions.
The substance may cake under the influence of moisture.

7.3 Specific end use(s) See item 1.2

(Contd. on page 4)
SECTION 8: Exposure controls/personal protection

- Additional information about design of technical facilities:
  Mechanical ventilation at the point of escape of steam or fog.

- 8.1 Control parameters
- Ingredients with limit values that require monitoring at the workplace: Not required.

- Additional information: The lists valid during the making were used as basis.

- 8.2 Exposure controls
- Personal protective equipment:
  - General protective and hygienic measures:
    In accordance with Directive 89/686/EEC on personal protective equipment
    The usual precautionary measures are to be adhered to when handling chemicals.
  - Respiratory protection:
    Suitable respiratory protective device recommended.

Use respiratory protection in the case of formation or release of dust / aerosols.

Use a European Standards approved filtering half mask, with a P2 medium efficiency or P3 high efficiency filter.

- Protection of hands:

Protective gloves

- Material of gloves
  Suitable materials also with prolonged, direct contact
  (Recommended: Protective index 6, corresponding > 480 minutes of permeation time according to EN 374)
  Butyl rubber, BR
  Recommended thickness of the material: ≥ 0.7 mm
  Nitrile rubber, NBR
  Recommended thickness of the material: ≥ 0.4 mm

(Contd. on page 6)
PARTITION COEFFICIENT (n-octanol/water): Not applicable to inorganics

- Viscosity:
  Dynamic: Not applicable to solid

- 9.2 Other information
  No further relevant information available.

- Molecular mass
  132.1395 g/mol

SECTION 10: Stability and reactivity

- 10.1 Reactivity
  Reacts with oxidising agents.

- 10.2 Chemical stability
  Stable at temperatures below 200 °C

- Thermal decomposition / conditions to be avoided: Tª > 200°C

- 10.3 Possibility of hazardous reactions
  Reacts with oxidising agents.

- 10.4 Conditions to avoid
  High temperatures (> 200 °C)

- 10.5 Incompatible materials: Oxidizing materials

- 10.6 Hazardous decomposition products:
  Ammonia
  Sulphur trioxide (SO3) or SO3-mist
  Nitrogen oxides (NOx)

SECTION 11: Toxicological information

- 11.1 Information on toxicological effects

- Acute toxicity

- LD/LC50 values relevant for classification:

<table>
<thead>
<tr>
<th>Route</th>
<th>LD50/LC50</th>

<td></td>
</tr>
<tr>
<td>Inhalative</td>
<td>&gt;1000 mg/Kg (rat)</td>
<td></td>
</tr>
</tbody>
</table>

- Primary irritant effect:
  - Skin corrosion/irritation
    Not irritating (rabbit)
    Based on available data, the classification criteria are not met.

- Serious eye damage/irritation
  Not irritating to the eyes of rabbits
  Based on available data, the classification criteria are not met.

- Respiratory or skin sensitisation
  Not sensitizing (guinea pig, maximisation test)
  Based on available data, the classification criteria are not met.

- Other information (about experimental toxicology):
  - Aspiration hazard, not anticipated.
  - Subacute to chronic toxicity: No STOT effects observed, following single exposure.
  - Repeated dose toxicity: No STOT effects observed
  - CMR effects (carcinogenicity, mutagenicity and toxicity for reproduction)
    No developmental or reproductive effects observed in rats or mice.
    Ames test: Negative
    Chromosomal aberration test: positive
    No mutagenic or clastogenic potential

- Germ cell mutagenicity
  Based on available data, the classification criteria are not met.

- Carcinogenicity
  Based on available data, the classification criteria are not met.

- Reproductive toxicity
  Based on available data, the classification criteria are not met.

- STOT-single exposure
  Based on available data, the classification criteria are not met.

- STOT-repeated exposure
  Based on available data, the classification criteria are not met.

(Contd. on page 7)
· Aspiration hazard Based on available data, the classification criteria are not met.

· 12.2 Persistence and degradability Not applicable, as the substance is inorganic.

· 12.3 Bioaccumulative potential Not likely because of hydrolysis.

· 12.4 Mobility in soil
  The substance is not expected to be fixed in the soil solid phase, as it is hydrolytically unstable

· 12.5 Results of PBT and vPvB assessment

PBT:
As ammonium sulfate is an inorganic substance, the PBT and vPvB don't have to be carry out in accordance with Annex XIII of REACH.

vPvB:
As ammonium sulfate is an inorganic substance, the PBT and vPvB don't have to be carry out in accordance with Annex XIII of REACH.

· 12.6 Other adverse effects No further relevant information available.

SECTION 13: Disposal considerations

· 13.1 Waste treatment methods

Recommendation
Must not be disposed together with household garbage. Do not allow product to reach sewage system.
Collect substance in suitable container
After prior treatment product has to be disposed of in an incinerator for hazardous waste adhering to the regulations pertaining to the disposal of particularly hazardous waste.

Uncleaned packaging:
Recommendation: Disposal must be made according to official regulations.
Recommended cleansing agents: Water, if necessary together with cleansing agents.

SECTION 14: Transport information

· 14.1 UN-Number

The substance is not classified under transport regulations

· 14.2 UN proper shipping name

The substance is not classified under transport regulations

(Contd. on page 8)
Safety data sheet
according to Regulation (EC) 1907/2006

Printing date: 25.06.2015
Date of compilation / revision: 25.06.2015
Version / revision nº: 6

| · ADR, ADN, IMDG, IATA | None |
| · 14.3 Transport hazard class(es) | The substance is not classified under transport regulations |
| · ADR, ADN, IMDG, IATA |
| · Class | None |
| · 14.4 Packing group | The substance is not classified under transport regulations |
| · ADR, IMDG, IATA | None |
| · 14.5 Environmental hazards: | Not applicable. |
| · 14.6 Special precautions for user | Not applicable. |

SECTION 15: Regulatory information

· 15.1 Safety, health and environmental regulations/legislation specific for the substance or mixture
· Chemical safety assessment
Although the Chemical Safety Assessment has been carried out, Exposure Scenarios are not required in this SDS because the substance is not classified as dangerous.
· Additional Information:
This substance/mixture does not legally require an SDS based on Regulation 1907/2006 (REACH). However, this SDS format is utilized to supply information required according to Article 32 of REACH.
· 15.2 Chemical safety assessment: A Chemical Safety Assessment has been carried out.

SECTION 16: Other information

This information is based on our present knowledge. However, this shall not constitute a guarantee for any specific product features and shall not establish a legally valid contractual relationship.

· Training hints
Specific training of workers to comply with the requirements specified in the Safety Data Sheet is required.

· Department issuing MSDS: Corporate Social Responsibility-Product liability
· Contact: Contact with business unit for any issue related to the safety data sheet

Abbreviations and acronyms:
ADR: Accord européen sur le transport des marchandises dangereuses par Route (European Agreement concerning the International Carriage of Dangerous Goods by Road)
IMDG: International Maritime Code for Dangerous Goods
IATA: International Air Transport Association
GHS: Globally Harmonised System of Classification and Labelling of Chemicals
EINECS: European Inventory of Existing Commercial Chemical Substances
CAS: Chemical Abstracts Service (division of the American Chemical Society)
DNEL: Derived No-Effect Level (REACH)
PNEC: Predicted No-Effect Concentration (REACH)
LC50: Lethal concentration, 50 percent
LD50: Lethal dose, 50 percent

* Data compared to the previous version altered.
Section 2: P frases introduced in order to comply with fertilizers legislations.
