 Hazard statements 	H315 Causes s	kin irritation.
	H319 Causes s	erious eye irritation.
		e an allergic skin reaction.
	H411 Toxic to a	quatic life with long lasting effects.
 Precautionary statements 	P101	If medical advice is needed, have product container or label
		at hand.
	P102	Keep out of reach of children.
	P103	Read label before use.
	P261	Avoid breathing vapours.
	P273	Avoid release to the environment.
	P280	Wear protective gloves/protective clothing/eye protection/face protection.
	P302+P352	IF ON SKIN: Wash with plenty of water.
	P305+P351+P3	38 IF IN EYES: Rinse cautiously with water for several minutes.
		Remove contact lenses, if present and easy to do. Continue rinsing.
	P333+P313	If skin irritation or rash occurs: Get medical advice/attention.
	P501	Dispose of contents/container in accordance with local/ regional/national/international regulations.
 Additional information: 2.3 Other hazards 	Contains epoxy	constituents. May produce an allergic reaction.
Results of PBT and vPvB assess		
• <u>PBT:</u>	Not applicable.	
• <u>vPvB:</u>	Not applicable.	

SECTION 3: Composition/information on ingredients

• 3.2 Chemical characterisation: Mixtures

Description:	Mixture of substances listed below with nonhazardous additions.	
Dangerous components:		
CAS: 25068-38-6 NLP: 500-033-5 Index number: 603-074-00-8 Reg.nr.: 01-2119456619-26-0000	reaction product: bisphenol-A-(epichlorhydrin) epoxy resin (number average molecular weight = 700) Aquatic Chronic 2, H411 Skin Irrit. 2, H315; Eye Irrit. 2, H319; Skin Sens. 1, H317	50-100%
CAS: 28064-14-4 EC number: 608-164-0 Reg.nr.: 01-2119454392-40-xxxx	phenol, polymer with formaldehyde, glycidyl ether Aquatic Chronic 2, H411 Skin Irrit. 2, H315; Skin Sens. 1, H317	12.5-25%
CAS: 16096-31-4 EINECS: 240-260-4 Reg.nr.: 01-2119463471-41	1.6-hexanediol diglycidyl ether Skin Irrit. 2, H315; Eye Irrit. 2, H319; Skin Sens. 1, H317 Aquatic Chronic 3, H412	12.5-25%
 Additional information: 	For the wording of the listed hazard phrases refer to section 16.	

SECTION 4: First aid measures

 General information: 	Take affected persons out into the fresh air.
	Position and transport stably in side position.
	Immediately remove any clothing soiled by the product.
After inhalation:	Supply fresh air and to be sure call for a doctor.
	In case of unconsciousness place patient stably in side position for
	transportation.
After skin contact:	If skin irritation continues, consult a doctor.
	Immediately wash with water and soap and rinse thoroughly.
After eye contact:	Rinse opened eye for several minutes under running water. If symptoms persist
	consult a doctor.

Safety data sheet

according to 1907/2006/EC, Article 31 Printing date 12.07.2018 Version number 6 Revision: 12.07.2018 Trade name: Akepox 2005 Laminating Resin 3 + 3 **Component A** (Contd. of page 3) Do not allow product to reach sewage system or any water course. Inform respective authorities in case of seepage into water course or sewage system. Do not allow to enter sewers/ surface or ground water. 6.3 Methods and material for containment and cleaning up: Dispose of the material collected according to regulations. Absorb with liquid-binding material (sand, diatomite, acid binders, universal binders, sawdust). Ensure adequate ventilation. See Section 7 for information on safe handling. · 6.4 Reference to other sections See Section 8 for information on personal protection equipment. See Section 13 for disposal information. **SECTION 7: Handling and storage** · 7.1 Precautions for safe handling Keep receptacles tightly sealed. Store in cool, dry place in tightly closed receptacles. Use only in well ventilated areas. Ensure good ventilation/exhaustion at the workplace. Prevent formation of aerosols. · Information about fire - and explosion protection: No special measures required. · 7.2 Conditions for safe storage, including any incompatibilities · Storage: · Requirements to be met by storerooms and receptacles: Store only in the original receptacle. Prevent any seepage into the ground. · Information about storage in one common storage facility: Store away from reducing agents. Store away from foodstuffs. · Further information about storage conditions: Store receptacle in a well ventilated area. Keep container tightly sealed. No further relevant information available. 7.3 Specific end use(s) **SECTION 8: Exposure controls/personal protection** Additional information about design of technical facilities: No further data; see item 7. 8.1 Control parameters · Ingredients with limit values that require monitoring at the workplace: The product does not contain any relevant quantities of materials with critical values that have to be monitored at the workplace. 	The protection gloves to be used have to comply with the specifications of the directive 89/686/EC and the directive derived decree EN374, respectively, e.g the above listed protection glove type. The mentioned permeation times' data were generated and verified with material samples of the recommended protection glove type in the scope of laboratory anylyses of the company KCI GmbH in compliance with EN374. This recommendation refers exclusively to the material safety data shee referenced product delivered by Akemi and the indicated field of application. In case of product dilution or in case of mixture with different substances or chemicals, and in condition of EN374 deviation the producer of CE-approved protection gloves must be contacted for detailed information (e.g., KCL GmbH
	Germany, 36124 Eichenzell, internet: http://www.kcl.de). Protective gloves
	I Totobilive gioves
	The glove material has to be impermeable and resistant to the product/ the substance/ the preparation.
	Due to missing tests no recommendation to the glove material can be given for the product/ the preparation/ the chemical mixture. Selection of the glove material on consideration of the penetration times, rates of diffusion and the degradation
<u>Material of gloves</u>	Butyl rubber, BR Chloroprene rubber, CR Nitrile rubber, NBR
 Penetration time of glove material 	The selection of the suitable gloves does not only depend on the material, bu also on further marks of quality and varies from manufacturer to manufacturer As the product is a preparation of several substances, the resistance of the glove material can not be calculated in advance and has therefore to be checked prior to the application. Value for the permeation: Level \leq 6, 480 min The exact break trough time has to be found out by the manufacturer of the
· For the permanent contact gloves	protective gloves and has to be observed.
made of the following materials are	
suitable:	Butyl rubber, BR
	Butoject (KCL, Art_No. 897, 898) Nitrile rubber, NBR
